Kay

Copy of an email received today. The solution for your committee to consider is to require both parents to share the cost of having access to the kids when one parent moves away. It is not fair that one parent should have to pay child support and never see their children....for your committee consideration.

Peter

Subject: Child Support Changes

Mr. Lindsay,
Re the article in the Townsville Bulletin 6th October 2003, I'm yet another Father effected by the Child Support payment system. I agree the payment and support should be given to children/parents, however the system needs to look at the rate and availability of access with regard to the children. My position is that I reside in Townsville while my children reside in Brisbane(previously Cairns), I have made approaches to my ex partner on the lines of private arrangements(as is wanted by the CSA) but to no avail. This leaves me with Full payments for the two boys and no money to travel either myself or the boys for visits.

If in the future you require support for Fast Tracking changes please contact me.

Regards

Andrew Mason
